

# IBRA<sup>®</sup> Digital Health Suite

The IBRA<sup>®</sup> DHS is a web-based software system for the management and quality control of cataract and refractive surgery.

The suite offers a comprehensive range of services to surgeons, center management and medical device manufacturers, incl.

- **Cataract services:** for cataract and premium IOL surgery
- **Refractive services:** for refractive laser eye surgery
- **Patient services:** for patient education and engagement
- **Visualization services:** for dashboard presentation of surgical outcomes

A central hub connects the other IBRA services with data entry forms and 3<sup>rd</sup> party software (e.g. EMR software or laser planning software) and provides highest levels of security and scalability.

The DHS cloud is ISO 27001 and Zubisoft is ISO 13485 certified.

# IBRA<sup>®</sup> Patient Services

The Suite offers the following key patient services:

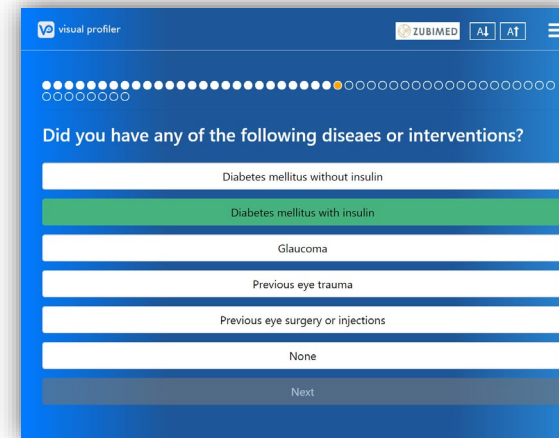

## Document Management

Surgeon individualized document support for patients with 'mandatory' document reads and task list. Important documents can be signed digitally, and copies are emailed directly to the patient.

## Visual Need Assessment

Assessment of the patients' visual needs and engagement is done with a quick and easy-to-understand survey (7min) with a modern touch-screen enabled user interface.

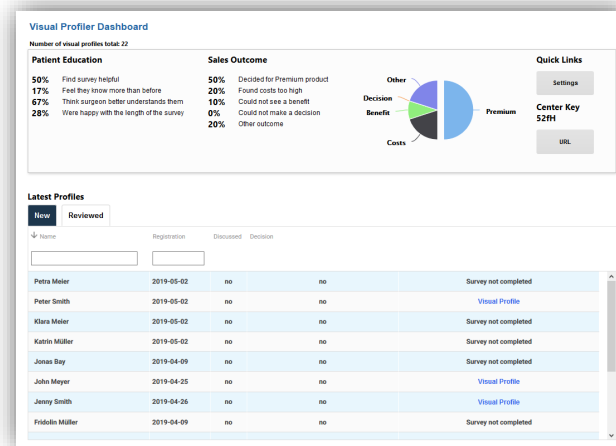

The Suite offers the following key patient services:

## Evaluation Dashboard

Conversion and decision outcomes are summarized and presented in a pie chart. Further details are available on the chosen products.
